Il piatto doccia Pegaso è un prodotto sartoriale costruito su specifiche indicazioni del cliente, è altamente personalizzabile per materiale, tipo e posizione della piletta. Pegaso può essere fornito in due materiali: Laminam oppure Gres, che sono miscele di materie prime naturali. Uniscono allo spessore ridotto e alle grandi dimensioni un'elevata resistenza alle sollecitazioni meccaniche, agli attacchi chimici, ai graffi e all'abrasione. Si puliscono con estrema facilità mantenendo inalterate le caratteristiche della superficie; l'unico prodotto in grado di attaccarli è l'acido fluoridrico. Resistono ai graffi e all'abrasione profonda e le sue proprietà rimangono pertanto inalterate anche dopo un uso intenso e una pulizia frequente. Sono totalmente compatibili con le sostanze alimentari in quanto non rilasciano elementi in soluzione. Non consentono l'insorgenza di muffe, batteri e funghi.

The Pegaso shower tray is a tailor-made product built on customer indications; it is highly customizable for material, type and position of the drain. Pegaso can be supplied in two materials: Laminam or Gres, which are mix of natural raw materials.

They combine reduced thickness and large dimensions with a high resistance to mechanical stresses, chemical attacks, scratches and abrasion. They are extremely easy to clean, preserving the characteristics of the surface; the only product capable of attacking them is hydrogen fluoride. They resist scratches and deep abrasion and their own properties therefore remain unchanged even after an intense use and a frequent cleaning. Will not occur on this type of surface mold, bacteria and mushrooms.

Le receveur de douche Pegaso est un produit sur mesure construit sur indications spécifiques du client, il est personnalisable à la fois pour le matériau, le type et la position du drain. Pegaso peut être fourni en deux matériaux: Laminam ou Grès, qui sont des mélanges de matières premières naturelles. Ils combinent une épaisseur réduite et des grandes dimensions avec une haute résistance aux contraintes mécaniques, aux attaques des produits chimiques, rayures et abrasions. Ils se nettoient en manière extrêmement facile, sans altérer les caractéristiques de la surface; le seul produit capable de les attaquer est l'acide fluorhydrique. Ils résistent aux rayures et à l'abrasion profonde et ses propriétés restent donc inchangées même après une utilisation et un nettoyage intense et fréquent. Ils ne permettent pas l'apparition de moisissures, de bactéries et parasites.

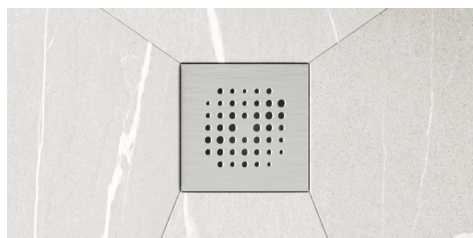

> Manutenzione Maintenance Entretien

Per una facile manutenzione pulire la superficie con acqua tiepida e detergente delicato, usando un panno o una spugna morbida, non abrasivi e umidi. Risciacquate bene la superficie e asciugate con un panno morbido.

For an easy maintenance, clean the surface with warm water and a mild detergent, using a cloth or a soft, non-abrasive and damp sponge. Rinse well the surface and dry it with a soft cloth.

Pour un entretien facile, nettoyez la surface avec de l'eau tiède et un détergent non agressif, à l'aide d'un chiffon ou d'une éponge douce, non abrasive et humide. Rincez bien la surface et séchez-la avec un chiffon doux.
